

## Witch Trial

### System Requirements...

Apple IIe, IIc, IIc+ or IIgs with mouse or joystick. Soundtrack available if Mockingboard card installed. The game is released on an 800k disk image suitable for 3.5" drives or emulated Prodos devices.

### Gameplay...

Witch Trial has a point and click interface. Navigation and interaction controls are available to the right of the screen when you hover over them with the pointer, NSEW for direction, T to talk, I for inventory and click to progress through information screens. Quest items can be picked up (one at a time) by clicking on the image on the screen. S followed by a click will toggle the music and Q followed by a click will take you back to the start menu.

### Hints and Tips...

Be sure to speak to everyone you encounter. Some people will be helpful, some not so much but remember, their willingness to talk to you may change during the course of the game. We have included a GIF map if you get stuck or if you want a slightly easier time of it!
